
Bars: seed means; whiskers: 95% seed-bootstrap intervals (omitted for n < 2).
Cost: all paired seeds, including failure-tail penalties. RMSE and effort: seeds completed by every controller.
Failures: Nominal PD: 0/1; Bias linear: 0/1; Bias nonlinear: 0/1; DAC linear: 0/1; DAC nonlinear: 0/1
Single-seed execution check only; not research evidence.
